Kent Scientific
CORPORATION

The RightTemp temperature monitor and homeothermic control module will accurately monitor and control animal temperature while safely warming your animal with far infrared heat.

PhysioSuite with RightTemp Module includes:-

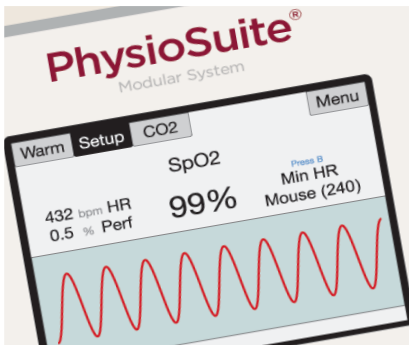

- Controller
- Far infrared warming pad (8"x10")
- Two temperature sensors
- Disposable sleeve protectors (10)

1-Year Parts & Labor Warranty

Product Specifications:

Resistance:	2,252 ohms
Tolerance:	+/- 0.2° C
Accuracy:	0-70° C
Operating Temperature:	-60° C to 150° C
Sensor Diameter:	Ball tip dia: 0.077" Shaft dia: 0.062"
Time Constant:	15.0 seconds
Heat Dissipation:	0.75 m/W (°C)

Optional Add-On Modules:

MouseSTAT® Pulse Oximeter and Heart Rate Monitor Module*

Measure heart rates up to 900 bpm

CapnoScan® CO2 Monitor Module

Collect accurate end-tidal CO2 measurements

Far Infrared Warming Pads

Infrared heat penetrates deeper than traditional warming methods, warming your animal quickly and safely.

Pads available in two sizes.

SurgiSuite Surgical Platform

The SurgiSuite surgery platform easily integrates with PhysioSuite or any of our far infrared warming controllers.

Warm your animal while measuring vital signs during surgery.

* The RightTemp module is included with all PhysioSuite units - a value of \$1,000
