

Far Infrared Warming Products

Choose the best solution for your research

Kent Scientific's Far Infrared warming products provide a variety of options to safely warm your animals. From simple pad power regulation to automatic control based on temperature feedback, we have the solution to every research warming requirement.

Features & Benefits:

- **Deep Penetration**
Warms animal quickly and safely
- **Small Footprint**
Easily fits into your surgical setup
- **Homeothermic options**
Regulate animal temperature

Woven PVC fabric warming pad
available in 2 sizes

Far Infrared Warming

Product Selection Guide

Warming Pad Control

- Small footprint; easily fits into your surgical set-up
- Large display; quickly set and identify target temperature
- Operates using AC power

RightTemp® Jr Homeothermic Control

- Automatic control measures and regulates your animal's temperature
- Includes temperature sensor
- Far infrared warming pad provided

PhysioSuite® RightTemp® Module with Advanced Features

- Temperature monitor and homeothermic control
- Modular physiological monitor system
- Optional modules for pulse oximetry and heart rate and end-tidal CO₂

	Warming Pad Control	RightTemp® Jr Homeothermic Control	PhysioSuite®
