# **Far Infrared Warming Products**

Choose the best solution for your research

Kent Scientific's Far Infrared warming products provide a variety of options to safely warm your animals. From simple pad power regulation to automatic control based on temperature feedback, we have the solution to every research warming requirement.

### Features & Benefits:

- Deep Penetration Warms animal quickly and safely
- Small Footprint

  Easily fits into your surgical setup
- Homeothermic options

  Regulate animal temperature

Nylon fabric warming pad available in 2 sizes

## Far Infrared Warming

### **Product Selection Guide**

#### **Warming Pad Control**

- Small footprint; easily fits into your surgical set-up
- Large display; quickly set and identify target temperature
- Operates using AC power

### RightTemp® Jr Homeothermic Control

- Automatic control measures and regulates your animal's temperature
- Includes temperature sensor
- Far infrared warming pad provided

### PhysioSuite® RightTemp® Module with Advanced Features

- Temperature monitor and homeothermic control
- Modular physiological monitor system
- Optional Modules for ventilation, end-tidal COĐ, pulse oximetry and heart rate monitoring
